Objective

Web Developer with over 2 years of hands-on experience in designing and developing web applications. Skilled in HTML, CSS, JavaScript, and React, with a deep understanding of modern web technologies and agile methodologies. Looking for a chance to work with a dynamic team, develop easily adaptable and successful web solutions, and develop continually in an ever-changing environment.

Experience

TATA Consultancy Services, Hyderabad

Developer

July 2021 - December 2022

- Developed and maintained web applications focused on API services using a microservices architecture.
- Designed and implemented REST APIs for third-party integrations and improved system scalability.
- Participated in agile development practices, including sprint planning and daily stand-ups.
- Conducted code reviews, unit tests, and debugging to ensure high-quality code and performance.
- Collaborated closely with cross-functional teams to develop user-centered solutions and enhance product strategy.

Fartello Infotech PVT LTD, Hyderabad, Telangana

Web Developer Intern

August 2020 - May 2021

- Developed dynamic user interfaces using HTML, CSS, and JavaScript.
- Integrated front-end components with MySQL databases, ensuring effective data storage and management.
- Implemented user authentication and authorization features using Java Servlets and JSP, ensuring secure access to applications.
- Collaborated in debugging, troubleshooting, and optimizing the performance of web applications.

Projects

Venue Booking System

React, JavaScript, CSS

- Developed a web-based venue booking platform allowing users to search, view, and book venues based on availability.
- Created responsive front-end components using React for smooth user interaction.

- Implemented RESTful APIs to handle real-time booking data and ensure seamless integration between the front end and back end.
- Managed state and data flow within the app using React's hooks and state management techniques.

Todo List Application

React, JavaScript, CSS

- Built an interactive to-do list application using React that allows users to create, update, and delete tasks.
- Used React hooks to manage state effectively and optimized the app for performance.
- Applied responsive design principles to ensure compatibility across devices.
- Added form validation using react-hook-form to improve user experience and functionality.

Skills

- **Languages & Technologies:** HTML, CSS, JavaScript, React, Node.js, Python, MySQL
- **Frameworks:** React, Bootstrap, Express.js
- **Tools & Platforms:** Git, GitHub, VSCode, Agile Methodologies
- **API Integration:** REST APIs, third-party integrations
- **Development:** Front-end development, UI/UX Design, Back-end basics (Node.js)
- **Version Control:** Git, GitHub
- **Databases:** MySQL, MongoDB

Education

Certificate in Computer Systems

British Columbia Institute of Technology, British Columbia, Canada
January 2023 - December 2024

BTech in Electronics and Communication

Malla Reddy Engineering College, Hyderabad, India
August 2017 - June 2021

Certifications:

- **Programming in Java - NPTEL**
- **Programming in Python**
